Why study Sports Coaching at UQ?
There is high demand for innovative and well-educated sports coaches in all sectors of sport. UQ sports coaching programs are ideal for practising or aspiring sports coaches wanting to break into the world of high performance coaching or advance or develop quality in their coaching practice.

These programs have been developed by a team of elite former international sports coaches, expert academics and researchers who have combined their knowledge and skills to offer the latest and most innovative theory and practice in sports coaching.

Your studies will engage you in work-based learning experiences that promote and encourage analysis and critical reflection on your current coaching practices and contexts. The programs are delivered online and available as part-time study, allowing you to balance your work commitments with study.

Career opportunities
The Graduate Certificate and Master of Sports Coaching will expand your career opportunities.
You will be well placed to move into more advanced coaching roles and work with high performance athletes and sporting teams. Careers include:
- head and assistant coach
- director of coaching
- high performance coach
- sports development manager
- coach educator.

Accreditation
While this degree may be accredited by an official industry accreditation body in Australia, completion may not result in graduates receiving automatic accreditation. Please contact the relevant registration body for details of any conditions for accreditation.

JOSH
Sports coaching graduate, Australia

"I studied sports coaching at UQ to supplement my practical knowledge and theory provided in the official AFL accreditation programs. What stood out for me about the program was the interactivity among coaches from different sports. It’s amazing what you can learn from other coaches and apply in your role day to day.

I have a dual role in opposition analysis and as a senior assistant coach."
