Why study Mental Health at UQ?
UQ's mental health programs provide systematic training designed to develop knowledge, skills and attitudes relevant to contemporary mental health practice. You will receive advanced training in a variety of evidence-based interventions and the theoretical principles that underpin them.

Teaching is provided by highly experienced practitioners and researchers, many of whom have national or international reputations for scholarship and professional practice. You have the opportunity to undertake both structured and independent learning assignments and study in a flexible environment which respects concurrent professional commitments.

Graduate Certificate in Mental Health
The Graduate Certificate in Mental Health provides an introduction to the specialist knowledge and skills required for mental health practice. You will learn about the framework for mental health practice (policy, law and models of service delivery) and acquire clinical knowledge and skills in areas such as assessment, treatment planning and widely used therapeutic interventions.

Graduate certificate courses form part of the Master of Mental Health programs and graduates of the Graduate Certificate may articulate into the Master of Mental Health.

Master of Mental Health
The Master of Mental Health is designed to meet advanced training standards for specialist mental health practice.

Career opportunities
As a graduate, you will have advanced skills and understanding in mental health for roles such as senior clinical, management, policy and planning mental health positions in both clinical and non-clinical settings.
