For a young girl who embarked on her study of Organisational Psychology, focusing on building skills such as critical analysis, problem solving, communication, consultation and organisational change skills, the Masters of Organisational Psychology at UQ prepares you for a career in organisational psychology practice, with a focus on building skills in organisational change, training and development, and selection and recruitment.

Why study Organisational Psychology at UQ?
This program prepares you for organisational psychology practice, with a focus on building skills in organisational change, training and development, and selection and recruitment.

Organisational psychology seeks knowledge of behaviour in organisational settings by systematically studying individual, group and organisational processes. Organisational psychology employs a ‘scientist-practitioner’ method of enquiry, first to seek understanding of behaviour within employment contexts, and then to develop techniques and skills which foster employee well-being and organisational effectiveness.

Career opportunities
As a graduate, you can work in varied and challenging roles in business, the public sector and the community. The main areas for employment include:
- selection and recruitment
- training and development
- organisational development and change
- team design, ergonomics, measurement and evaluation
- academic teaching and research.

The work of an organisational psychologist revolves around the development of an organisation’s human resources to enhance motivation, performance and satisfaction.

As a graduate, you may be involved in developing effective selection systems, designing and delivering training programs, introducing organisational change, designing jobs and organisational structures, facilitating the development of teams and training and developing executives, managers and supervisors.

For more information about employment opportunities go to the Australian Psychological Society website at www.psychology.org.au

Professional memberships
Graduates may be eligible for membership with the following professional body:
- APS College of Organisational Psychologists (associate membership).

Accreditation
The program is recognised by the Psychology Board of Australia as providing suitable training towards eligibility for general registration as a psychologist, and by the Australian Psychological Society (APS) as suitable for general membership of that Society. The degree is accredited by the Australian Psychology Accreditation Council.

"For a young girl who embarked on her journey as a prospective journalism student—uncertain about her options and career goals—I have come a long way. UQ has facilitated my journey and helped me graduate from The University of Queensland in 2012 with a Bachelor of Psychological Science (Honours) and a Master of Organisational Psychology. I am now a registered psychologist, practicing as a Senior Consultant for a boutique organisational psychology business. UQ was a permanent fixture for eight years of my life, with experiences that include building a strong network of friends and professional connections, living at Emmanuel College, completing undergraduate and postgraduate studies, working as a research assistant and later working on a range of professional projects for the School. UQ has played a very influential role in my life and I look forward to maintaining my connection as an alumnus in the years to come."
