2016
While enjoying a campus life like no other, at a university consistently ranked well inside the world’s top 100 (of more than 10,000), you will learn from the best, with the best, to earn a highly valued qualification that will open doors around the world.

**SUCCESSFUL GRADUATES**
Full-time employment rates and salaries higher than national graduate average

**GLOBAL CONNECTIONS**
Extensive graduate network, strong industry partnerships and many notable alumni

**VIBRANT CAMPUSES**
Dynamic sports and cultural activities, 190+ clubs and societies

**GREAT EXPERIENCES**
Overseas study, field trips, practical experiences, vacation research programs and more

**EXCELLENT TEACHERS**
More national teaching awards than any other Australian university*

**LEADING RESEARCH**
Global research powerhouse with all fields above world standard**

**HIGH-QUALITY PROGRAMS**
Most comprehensive range of quality programs and courses in Queensland

* Surpassed 100 Office for Learning and Teaching (OLT) Citations for Outstanding Contributions to Student Learning, Awards for Teaching Excellence, and Awards for Programs that Enhance Learning in 2014
** 2012 Excellence in Research for Australia (ERA) assessment
HEALTH AT UQ

The health industry employs the highest number of people of any industry in Australia. Careers in health continue to evolve with new technologies and discoveries, ensuring there is a constant demand for health graduates.

Important for everybody
As individuals, good health is our greatest asset. As members of a global community, access to the best possible health advice and care is fundamental to our quality of life.

At UQ, we are committed to advance the understanding of:
• how to promote and sustain good health
• how to detect, prevent and manage the chronic diseases that cause premature death and disability;
• how to build better healthcare services and systems.

This knowledge is coupled with the very best learning methods and support to educate the next generation of leaders in healthcare provision and innovation.

Learning
We offer the widest range of health study areas of any Australian university. Our academics include award-winning lecturers who combine teaching with internationally recognised research to create a cutting edge learning experience.

Our students undertake clinical or industry placements in a variety of healthcare settings, including major hospitals and the University’s own dentistry, rehabilitation and psychology clinics, as well as newly established multidisciplinary primary care centres. Placement opportunities are also offered with partner healthcare organisations internationally.

At UQ:
• many of our health educators are leading practitioners who choose to combine teaching with professional practice and important research
• our health educators have received prestigious Australian teaching awards every year for the past seven years
• many of our researchers have made internationally recognised discoveries in their fields of expertise.

Learn with the best
At UQ, you will study alongside Queensland’s top students and other high-achieving students from around Australia and the world. Many UQ graduates go on to become leaders in their field.

Practical experience
At UQ, we focus on inter-professional education to make our graduates workplace-ready. Our undergraduate health students undertake clinical (working with clients) or industry placements with our network of local, national and international hospitals and healthcare partners. These include major hospitals and private practices throughout Queensland, Australia and overseas.

You will graduate confident and ready to commence a dynamic career in your chosen field.

At the forefront of discovery
Our researchers translate discovery, innovation and interaction into health and medical care best practices that lead to life-changing benefits for both individuals and whole populations. Our research is intensive, world-leading, and covers the full spectrum – from the molecular to the macro, and lab bench to the bedside and beyond. UQ sets the national benchmarks for integrated health research by investing heavily in health and medical research and offering Australia’s widest range of tertiary health study options.

PARTNERSHIPS
Health at UQ students gain extensive practical experience through placements with our network of local, national and international hospitals and healthcare partners.

GREAT JOB PROSPECTS
Employers recognise the high quality skills and expertise of Health at UQ students, with the majority of our graduates employed within four months*

WORLD-CLASS FACILITIES
Health at UQ has invested heavily in world-class facilities to ensure the best equipment, labs and expertise are available to students for their learning.

* Australian Graduate Survey, survey years 2010-2014
Bachelor of
BIOMEDICAL SCIENCE
(HONOURS)

Get hands-on, practical experience in state-of-the-art laboratories with Biomedical Science at UQ and discover the latest in globally relevant biomedical research. UQ’s Bachelor of Biomedical Science (Honours) will give you the theoretical and practical skills for an exciting career in an industry that’s making incredible advances in modern medical science.

Why Biomedical Science at UQ?
Biomedical scientists understand how the human body works and what goes wrong in disease, and apply this knowledge to develop new treatments. From cancer screening and diagnosing HIV to blood transfusion for surgery, food poisoning and infection control, biomedical scientists provide the foundation of modern healthcare. Working in partnership with doctors, nurses and other healthcare professionals they diagnose disease, evaluate the effectiveness of treatment and research the causes and cures of disease. Biomedical Science at UQ is based on the latest research developments to make sure you will graduate with the skills, knowledge and understanding to enter a rewarding career in modern biomedical science.

What you will study
The Bachelor of Biomedical Science will give you foundation skills in chemistry, biology, physics, statistics and research. In your second and third years, you will specialise in a chosen area and have the option to pursue a research project and study abroad. You will also work on projects in research labs while on placement to give you first-hand experiences to help you graduate job-ready. In your final year you can undertake an additional research component and gain hands-on skills by conducting your own project.

You can specialise in the following areas:
- **Developmental Biology** examines how organisms and cells grow and develop according to their genetic blueprint. You will examine how genes contribute to the development of organs and tissues. This knowledge is central to understanding the basis of human health and disease.
- **Human Genetics** examines the human genome and its significance as the instruction book of life. You can contribute to the ethical debate on the use of genetic information and be a part of future discoveries identifying the genetic mechanisms that define what it is to be human.
- **Immunology and Infectious Diseases** investigates the factors that cause disease. Molecular and systems-based approaches allow researchers to gain a unique insight into physiology from many different perspectives.
- **Neuroscience** is a rapidly growing field examining animal and human nervous systems. The nervous system is a complex array of billions of interconnected fibres responsible for integrating, processing and co-ordinating sensory information and motor commands. You will examine how neural stem cells are being used in new therapeutic strategies to treat neurological and mental illnesses.
- **Pharmacology and Toxicology** examines drugs and their impact on the molecular structure of the human body. You will learn how pharmacologists are making a significant impact on diseases through advances in drug design and development, which are leading to new drugs or better use of existing drugs.
- **Physiology** studies how the body works, from the molecular and cellular levels to the integrative control of tissues, organs and systems. It aims to understand normal processes in the body and the changes that occur in cells, tissues and organs that lead to disease. Molecular and systems-based approaches allow researchers to gain a unique insight into physiology from many different perspectives.

Your future in Biomedical Science
Biomedical scientists have excellent career prospects in management, research, education and specialised laboratory work including:
- academia and research in universities, research institutes and hospitals
- technical and scientific roles in research projects
- biotechnology companies
- laboratory work in molecular and cellular biology
- other scientific roles that require logical reasoning and independent thinking.

Your postgraduate options
- Research higher degrees (MPhil and PhD) in your area of interest are also available. See page 50 for more information.

International students
Standard UQ English language proficiency requirements apply for this degree. You are required as an international student to complete the degree on a full-time basis. See page 50 for more information.

- Phone +61 7 3365 1888

“...there was never a question about which university I should choose for Biomedical Sciences. I wanted to do a research-based degree and UQ is one of the leading universities in scientific research in Australia. Studying a Bachelor of Biomedical Sciences at UQ gave me a real advantage through exposure to cutting edge research, world class facilities and inspirational researchers. I also met many like-minded people and made friends that I will have for life.”

Bachelor of DENTAL SCIENCE (HONOURS)

Study Dental Science at UQ and get hands-on, practical experience so you will graduate confident and job-ready with more than 2070 supervised hours spent on placement during your degree. As a UQ Bachelor of Dental Science (Honours) student you will study at UQ’s new Oral Health Centre – Australia’s largest and most advanced tertiary oral health facility.

Why Dental Science at UQ?

Choose a career in dental science and you will make a difference to the lives of many. Good oral health is important for everyone, making dentistry a primary healthcare profession. Study Dental Science (Honours) at UQ and you will learn from some of the best teachers in the country at the largest and most advanced tertiary dental facility in Australia, the new world-class UQ Oral Health Centre located near the Royal Brisbane and Women’s Hospital. You will learn from staff who have been awarded nationally for teaching excellence while gaining the knowledge and practical skills that place UQ Dental Science graduates in high demand with employers.

What you will study

The Bachelor of Dental Science (Honours) will give you the knowledge, skills and attitude for an exciting career in the dental industry. We prepare you to be well-sought after by employers and our extended clinical placements mean you’re job-ready when you graduate. You will learn the science and application for the prevention, diagnosis and treatment of oral diseases and abnormalities, while having access to the most up-to-date technologies and cutting-edge dentistry research.

The UQ Dental Science difference is our focus on practical, clinical experience throughout your degree. Clinical work will start at the UQ Oral Health Centre in your first year of study. This is increased in your third and fourth years and covers general practice dentistry, orthodontics, paediatric dentistry, periodontics and prosthetics, as well as oral medicine and oral and maxillofacial surgery in Brisbane teaching hospitals. In your final year you will complete a clinical placement to give you the hands-on skills and knowledge for a rewarding career. You may be placed in State Government health clinics, the Aboriginal Medical Service in Queensland or interstate.

What you need to apply

If you are an Australian or New Zealand citizen you must also sit the Undergraduate Medicine and Health Sciences Admission Test (UMAT). You must register for this test by early April in the year prior to commencing study. See umat.acer.edu.au for more information.

Important information

In accordance with the Dental Board of Australia policy, this degree is not suitable for applicants who are carriers of blood-borne transmissible viruses such as Hepatitis B, Hepatitis C and HIV. For further information, contact the School of Dentistry.

Your future in Dental Science

As a UQ-qualified dentist, you will be well sought after by employers and ready for a dynamic career in the dental industry. Your career choices can include:

- Private practice: once you are registered with the Dental Board of Australia, you can enter private practice on your own or you can work as an assistant with an established practitioner or join a partnership.
- Public sector: you can work as a dentist in the government, community-based and school-based dental clinics across Australia.
- Defence forces: you can enter the Navy, Army or Air Force as a dental officer on short service or permanent basis.

Who will recognise your qualifications?

- The Dental Board of Australia once registered, graduates are also eligible for membership of the Australian Dental Association
- The Dental Council of New Zealand (DCNZ) for membership of the New Zealand Dental Association
- The Trans Tasman Mutual Recognition Agreement
- The Commission on Dental Accreditation of Canada: further examinations are necessary to work in Canada.

Your postgraduate options

- The Doctor of Clinical Dentistry provides a recognised pathway for specialist training
- Research higher degrees (MPhil and PhD) in your area of interest are also available: see page 50 for more information.

International students

This degree requires you to have a higher level of English language than the UQ minimum. The IELTS requirements are an overall score of at least 7.0, with a score of 7.0 in reading, writing, speaking and listening. International students must also sit the International Student Admissions Test (ISAT), see www.isat.acer.edu.au for registration. You are also required to complete the degree on a full-time basis. See page 58 for more information.

Email dentistry@uq.edu.au
Phone +61 7 3365 8022

“I chose a career in dentistry because I wanted to work within the health industry to assist patients to improve their health and wellbeing. I love the hands-on nature of dentistry and the opportunity to develop long-term relationships with my patients. During my degree I was always supported by a great group of academics, teachers and other students. The facilities at the new Oral Health Centre are fantastic; they provide great opportunities for UQ Dentistry students to excel. I have had many great experiences while studying, however, spending five months living in Cairns working at the Cairns Queensland Health Dental Clinic is definitely one of my favourite memories.”

Bachelor of **EXERCISE AND NUTRITION SCIENCES**

UQ’s Bachelor of Exercise and Nutrition Sciences is a springboard to a range of exciting careers in areas including dietetics, medicine, exercise physiology, physiotherapy and more. Tailor this program to meet your own interests and career aspirations.

Why Exercise and Nutrition Sciences at UQ?

If you have a keen interest in exercise and nutrition or are considering a career in health, this is the degree for you. Exercise and nutrition sciences offers a broad range of career options both in Australia and overseas and provides the foundations for entry into a variety of clinical (where you interact with clients) and non-clinical (no client contact) postgraduate programs such as dietetics, medicine, exercise physiology, physiotherapy or sport and recreation. If your goal is medicine, this degree is a recommended entry pathway into the UQ Doctor of Medicine as it provides important foundations in the biomedical sciences, including anatomy, physiology and biochemistry. Keep your career options open and tailor your degree to suit your own interests. You will benefit from our experienced, award-winning teachers who have close networks with industry, as well as access to the latest developments and research in health, exercise and nutrition.

Your future in Exercise and Nutrition Sciences

Many graduates commonly combine a Bachelor of Exercise and Nutrition Sciences with a postgraduate qualification to prepare them for specialised careers, while others use their skills to gain employment within the exercise, fitness, health and nutrition sectors. With further study, this degree is your pathway into a wide range of careers.

Clinical careers

- **Dietitian or nutritionist**: the Bachelor of Exercise and Nutrition Sciences is a recommended pathway to study dietetics at UQ. You can complete the Exercise and Nutrition Sciences degree, at the GAMSAT exam and apply for graduate entry medicine.
- **Other clinical careers** (after further study):
  - exercise physiologist
  - physiotherapist
  - exercise or sport scientist
  - speech pathologist
  - audiologist
  - occupational therapist.
- **Non-clinical careers** (after further study):
  - sport scientist
  - health and physical education teacher
  - sports coach
  - health promotion officer or community health officer
  - sport and recreation manager
  - public health manager or researcher.

Your postgraduate options

The Bachelor of Exercise and Nutrition Sciences can give you the foundations to apply for entry into a range of postgraduate and graduate entry degrees such as:

- **Master of Dietetics Studies**
- **Master of Physiology Studies**
- **Master of Clinical Exercise Physiology**
- **Master of Occupational Therapy Studies**
- **Master of Sports Coaching**
- **Master of Audiology Studies**
- **Master of Speech Pathology Studies**
- **Master of Health Economics**
- **Graduate Diploma in Education**. See page 50 for more information. Honours is available as an additional year of study should you wish to pursue research in an area of interest.

Master of Dietetics Studies

You can fast-track your studies and become a fully accredited dietitian in 4.5 years with a Bachelor of Exercise and Nutrition Sciences/Master of Dietetics Studies*. We will guarantee you a place in the Master of Dietetics Studies when you graduate from the Bachelor of Exercise and Nutrition Sciences, as long as you have achieved an annual Grade Point Average of 5.0 and completed the necessary prerequisites. If you don’t receive a provisional place in the Master of Dietetics Studies you can complete the Bachelor of Exercise and Nutrition Sciences and apply for the Master of Dietetics Studies.

International students

Standard UQ English language proficiency requirements apply for this degree. You are required as an international student to complete the degree on a full-time basis. See page 58 for more information.

More information

For more information on Exercise and Nutrition Sciences at UQ: www.hmns.uq.edu.au

*Trial entry into the Bachelor of Exercise and Nutrition Sciences/Master of Dietetics Studies is only available to domestic students

---

**Why I chose Exercise and Nutrition Sciences**

*Mohammad Sulaiman is a third-year Exercise and Nutrition Sciences graduate.*

“Taking what I have learnt from the program I would like to go back to Malaysia and help teach others about the importance of a healthy lifestyle. Open discussion with the lecturer was really helpful in improving my knowledge and the practical activity has been fun. I hope to one day be working closely with the Department of Health in Malaysia and help teach others about the importance of a healthy lifestyle. Open discussion with the lecturer was really helpful in improving my knowledge and the practical activity has been fun. I hope to one day be working closely with the Department of Health in Malaysia and help teach others about the importance of a healthy lifestyle.”

*Provisional entry into the Bachelor of Exercise and Nutrition Sciences/Master of Dietetics Studies is only available to domestic students*
Why Exercise and Sport Sciences at UQ?
With an increasing emphasis on health and being active in today’s society, exercise and sports sciences is one of the fastest growing careers in the world. Exercise and sport sciences focuses on understanding and enhancing human movement and how the body reacts to fitness and exercise, sports, recreational and other intensive physical activities. At UQ, our focus is preparing you for a dynamic career and our extensive practical placements program makes sure you are job-ready when you graduate. You will work with a range of clients from children to elite athletes and have access to professionally equipped biomechanics, motor control, exercise physiology, and strength and conditioning laboratories. All our graduates are eligible for professional accreditation with Exercise and Sports Science Australia (ESSA). What you will study
The Bachelor of Exercise and Sport Sciences (Honours) provides a strong foundation in human movement and exercise including anatomy, biomechanics, motor control, exercise physiology, exercise and sport psychology, physical activity and health, sports medicine and exercise prescription. In your third year you can select electives to direct your studies towards a specialisation of your choice such as corporate and community health, strength and conditioning, sports performance or clinical exercise testing. In your final year you will complete 400 hours of professional practice in institutes or academies of sport, hospitals, private practice and professional sporting teams, as well as within our professionally equipped exercise sciences labs and clinics. This professional practice is what will set you apart from other graduates, as employers worldwide recognise the skills and practical knowledge gained through the outstanding teaching and facilities available in exercise and sport sciences at UQ. In your final year you will also undertake a research project under the guidance of an experienced researcher.
Clinical Exercise Physiology major
After you finish your first year you may be eligible to enter the Clinical Exercise Physiology major which will give you automatic accreditation with ESSA as a Clinical Exercise Physiologist, as well as accreditation as an exercise scientist. There are limited places available in this major and entry is based on Grade Point Average (GPA) at the end of the first year. As an accredited exercise physiologist you will specialise in the science of exercise and delivering exercise-based lifestyle and behavioural programs for people at high-risk of developing, or with existing, chronic and complex medical conditions and injuries such as diabetes, cardiovascular disease and depression. You will complete more than 500 hours of clinical exercise prescription and professional practice in Queensland, or around Australia and the world.
Your future in Exercise and Sport Sciences
There are many career options in exercise and sports sciences both in Australia and overseas, including:
• clinical exercise physiologist
• exercise and sport scientist
• biomechanist
• cardiac scientist
• respiratory technician
• strength and conditioning coach
• health promotion officer
• sports development manager
• corporate health and fitness advisor
• community recreation and fitness officer
• sport and exercise science researcher.
Who will recognise your qualifications?
• Exercise and Sports Science Australia (ESSA) membership open to graduates and accreditation as an exercise scientist is available. Clinical Exercise Physiologist accreditation open to graduates of the Clinical Exercise Physiology major.
Your postgraduate options
Coursework degrees are available in:
• clinical exercise physiology
• education
• sports coaching
• physiotherapy
• occupational therapy
• podiatry
• speech pathology
• graduate entry medicine.
See page 24 for more information.
Research degrees (MPhil and PhD) are also available in your area of interest. See page 50 for details.
International students
Standard UQ English language proficiency requirements apply for this degree. You are required as an international student to complete the degree on a full-time basis. See page 58 for more information.
More information
For more information on Exercise and Sport Sciences at UQ: www.hmns.uq.edu.au
Email: hmn@uq.edu.au
Phone: +61 7 3365 6240
* Re-accreditation of this degree will be sought in 2016.
Read more at: www.health.uq.edu.au/careers

Bachelor of EXERCISE AND SPORT SCIENCES (HONOURS)
Study Exercise and Sport Sciences at UQ and get hands-on, practical experience with 400 hours spent on placement during your exercise and sport sciences degree or 500 hours placement if you study clinical exercise physiology.

Duration 4 years full-time. Part-time equivalent available to domestic students only
Location St Lucia
Entry requirements Year 12 (or equivalent) English (4, SA), plus one of Biology, Chemistry or Physics (4, SA)*
GTAC code 729302 (Entry to the Clinical Exercise Physiology major is on the basis of grade point average at the end of Year 1. Limited places are available)
Delivery mode Internal
International availability Yes
(CRICOS 082624M)
Clinical placement Students must also complete post-admission requirements prior to starting clinical placements. See www.health.uq.edu.au/admissionsreqs
Prerequisites are expressed in terms of Queensland Year 12 subjects
• Exercise and Sports Science Australia
• sport and exercise science researcher.
•  community recreation and fitness officer
• sports development manager
• health promotion officer
• respiratory technician
• cardiac scientist
• clinical exercise physiologist
• community recreation and fitness officer
• sport and exercise science researcher.

Exercise and Sport Sciences graduate
During high school I was highly engaged in sporting activities: this ignited my interest into the complexities of the human body from a performance and rehabilitative perspective. UQ offers a very organised and supportive environment for learning, along with some of the best lecturers and facilities in the world. My placement at the Sub Acute Chronic Care Rehabilitation Service in Rockhampton was one of the most rewarding experiences of my time as a student. It offered me the opportunity to work as an integral member of a multidisciplinary healthcare team to facilitate optimal client outcomes. I have now extended my studies and am completing a PhD in Exercise Physiology. *

Read more at: www.health.uq.edu.au/careers
Study Health Sciences at UQ for a practical degree that is the foundation to many exciting careers in health. Health Sciences is a recommended undergraduate degree if your goal is to study medicine at UQ.

Why Health Sciences at UQ?
Health Sciences opens the door to a world of career opportunities in health where you can make a difference to the lives of many. Study Health Sciences at UQ for a pathway into clinical careers such as medicine, dentistry and non-clinical careers like public health, health promotion and health services management. This degree has been created in consultation with the health industry, which means you will learn the most relevant, up-to-date theory and gain hands-on experience to help you graduate job-ready. If your goal is medicine, the Bachelor of Health Sciences is a recommended pre-medical degree as it gives you a comprehensive overview of the biomedical sciences, public health, health behaviours and the healthcare system. You will learn from some of the country’s leading experts in health and our placement program in your third year means you will graduate with the practical skills and knowledge to pursue a rewarding career in health.

What you will study
The Bachelor of Health Sciences will give you the skills necessary for a career in health and is the perfect foundation degree if you want to do a clinical degree in medicine or dentistry. The degree incorporates study in areas including biomedical sciences (e.g. anatomy and physiology), public health, preventative health (e.g. health promotion, physical activity and nutrition), the business of health (e.g. health systems management) and professional practice (e.g. law and ethics). It’s the most flexible health degree available to prepare you for a clinical or non-clinical career. In your third year you will undertake 90 hours of practical placement to gain hands-on, industry experience.

Majors
You can study a major in:
• Health Promotion (see page 14)
• Nutrition (see page 15)
• Public Health (see page 15).

Your future in Health Sciences
Whether you want a clinical role, to prevent illness in the community, or to work behind the scenes in the business of health, this degree is your pathway to a rewarding career.

Non-clinical careers focus on preventing illness and disease where you can use your skills in the assessment, management, planning and delivery of efficient, quality healthcare, such as:
• health promotion officer, community health officer, project officer
• health service manager or health information officer in hospitals and other healthcare facilities
• community health clinic manager
• community nutritionist
• public health manager
• public health researcher.

Clinical careers:
• Medicine: the Bachelor of Health Sciences is a pathway to study medicine at UQ and is open to students who receive a provisional place in the Doctor of Medicine. Students who don’t receive a provisional place can complete the Health Sciences degree and sit the GAMSAT exam in their final year and apply for graduate entry into medicine.
• Other clinical options: if you don’t receive the OP required for direct entry into your chosen clinical degree you can study the Bachelor of Health Sciences first and then undertake postgraduate study to complete your clinical degree. Alternatively, you can study Health Sciences for one year and then re-apply via QTAC for entry into your clinical degree.
• Clinical careers (after further study) include:
  • occupational therapist
  • speech pathologist
  • audiologist
  • occupational therapist
  • nurse
  • social worker.

Your postgraduate options
Honours is available as an additional year of study
• Health Sciences graduates can continue their chosen clinical career by applying for entry into postgraduate/graduate entry coursework degrees such as:
  • Doctor of Medicine
  • Master of Dentistry Studies
  • Master of Occupational Therapy Studies
  • Master of Physiotherapy Studies
  • Master of Speech Pathology Studies
  • Master of Audiology Studies
  • Master of Nursing Studies
  • Master of Social Work Studies.

International students
Standard UQ English language proficiency requirements apply for this degree. You are required as an international student to complete the degree on a full-time basis. See page 58 for more information.

More information

Clinical careers:
• Medicine: the Bachelor of Health Sciences is a pathway to study medicine at UQ and is open to students who receive a provisional place in the Doctor of Medicine. Students who don’t receive a provisional place can complete the Health Sciences degree and sit the GAMSAT exam in their final year and apply for graduate entry into medicine.
• Other clinical options: if you don’t receive the OP required for direct entry into your chosen clinical degree you can study the Bachelor of Health Sciences first and then undertake postgraduate study to complete your clinical degree. Alternatively, you can study Health Sciences for one year and then re-apply via QTAC for entry into your clinical degree.
• Clinical careers (after further study) include:
  • occupational therapist
  • speech pathologist
  • audiologist
  • occupational therapist
  • nurse
  • social worker.

Your postgraduate options
Honours is available as an additional year of study
• Health Sciences graduates can continue their chosen clinical career by applying for entry into postgraduate/graduate entry coursework degrees such as:
  • Doctor of Medicine
  • Master of Dentistry Studies
  • Master of Occupational Therapy Studies
  • Master of Physiotherapy Studies
  • Master of Speech Pathology Studies
  • Master of Audiology Studies
  • Master of Nursing Studies
  • Master of Social Work Studies.

International students
Standard UQ English language proficiency requirements apply for this degree. You are required as an international student to complete the degree on a full-time basis. See page 58 for more information.

More information
For further information on Health Sciences at UQ: www.sph.uq.edu.au/study
Email: enquiries@sph.uq.edu.au
Phone: +61 7 3365 5345

* I was motivated to study Health Sciences to help people manage conditions such as food allergies or diabetes through dietary means. I chose to come to UQ for the facilities that the campuses and Brisbane have to offer. Between all the eating options and 24-hour libraries, I spent a lot of time on campus. Now that I have finished my degree, I am heading in the direction of research, hoping to increase our knowledge of how the food we eat influences our physiology and vice versa.”

Read more at: www.health.uq.edu.au/careers
Study UQ’s Bachelor of Health Sciences Health Promotion major and make a difference to the health of your community and reduce the growing burden of chronic disease.

Why a Health Promotion major in Health Sciences at UQ?
Health promotion is a rapidly growing sector within the healthcare industry due to the increase in chronic disease in today’s society. Study the Health Promotion major in the Bachelor of Health Sciences for a career in health promotion and disease prevention both in Australia and across the world.

During the degree you will complete foundation studies in health sciences and learn how to apply this knowledge to health promotion and health behaviours, physical activity, nutrition and the planning of health services. You will gain in-depth knowledge and understanding of these issues, the skills to analyse these situations and develop programs to address them. You will apply this knowledge in your third year, where you will spend 90 hours on placement in non-clinical health-related organisations around metro and rural Australia.

Your future with a Health Promotion major
Health Promotion graduates work in roles that improve the health of the population and reduce health inequities, such as:
- health promotion officer in government and non-government organisations
- health promotion officer in health units, community centres and non-profit organisations
- community health officer
- health promotion officer
- health promotion officer
- public health officer
- policy officer
- community health officer
- project officer
- program evaluator and policy officer
- project officer and consultant.

Your postgraduate options
The Bachelor of Health Sciences provides a broad overview of healthcare and gives graduates the foundation for a career in almost every aspect of the healthcare industry. It’s an excellent pathway if you want to keep your career options open or you don’t gain direct entry into your preferred clinical degree. The Health Promotion major allows you to go on to study a Master of Public Health or a Master of International Public Health, or progress to a clinical degree. The Health Promotion major will allow you to assess and manage public health problems in Australia and around the world.

Why a Nutrition major in Health Sciences at UQ?
The impact of food and nutrition on our daily lives is one of the most popular health topics in the world. From the obesity epidemic to specialised diets that promote health and wellbeing, the study of nutrition and the food we eat are integral to the health and longevity of our society. Study a major in Nutrition at UQ and you will gain a strong foundation in public health and community nutrition as well as a pathway to apply for UQ’s Master of Dietetics Studies. Study the Nutrition major at UQ to gain the skills and knowledge to work in community nutrition, to educate the population to make healthier eating choices and to reduce the burden of diet-related disease.

Your future with a Nutrition major
A major in Nutrition leads to careers in community nutrition and health, such as:
- community nutritionist in government organisations and community health
- community nutritionist in private organisations and non-profit agencies
- public health nutritionist
- health promotion officer
- policy officer
- program evaluator consultant.

 Provisional entry to the Master of Dietetics Studies
You can become a fully accredited dietitian in 4.5 years with the Bachelor of Health Sciences/Master of Dietetics Studies. The Bachelor of Health Sciences provides provisional entry into the Master of Dietetics Studies (see page 11). If you don’t get the OP needed for provisional entry, you can complete the Bachelor of Health Sciences Nutrition major and apply to enter Dietetics when you graduate. The Nutrition major gives you all the prerequisites courses needed for entry to the Master of Dietetics Studies, as well as core knowledge in public health and community nutrition.
UQ Pharmacy

EXPERIENCE DAY
Sunday, 23 August 2015

• Hear how the UQ Pharmacy degree opens many doors for students, including a pathway to a medicine degree
• Experience a guided tour of PACE, the first precinct in Australia dedicated to pharmacy education
• Find out how, as a “medication expert”, pharmacists today play a crucial role in medications advice
• Participate in hands-on lab activities
• Mingle at lunch with lecturers and current students to find out more about subject choices and career options.

Register now at www.uq.edu.au/pharmacy/experienceday

“Experience Day was very useful in helping me understand what it will be like to study pharmacy at UQ. I will definitely be putting UQ as my first preference to study pharmacy.” - Megan

“The new facilities are amazing! I can’t wait to commence pharmacy at UQ next year.” - David

“I realised there are many different aspects to pharmacy as a profession and I am going to work hard to raise my OP to ensure I can study at PACE next year.” - Ellie

Want to explore the different jobs in Health?
• Discover careers and trends
• Identify future job openings
• See what you could earn
• Find out more about the health industry.

Then download UQ’s Ultimate Guide to Health Jobs ebook at www.health.uq.edu.au/careers or return the postcard on the inside back cover of this guide.

BACHELOR OF
HEALTH, SPORT AND PHYSICAL EDUCATION (HONOURS)

Why Health, Sport and Physical Education at UQ?
Health, sport and physical education graduates are in high demand across the world as society places more emphasis on the need to be healthy and active. There are many career opportunities which are unique and diverse in both school and non-school settings within Australia and around the globe. Study Health, Sport and Physical Education at UQ and you will learn from award-winning teachers who have written textbooks in the field. Be rewarded with an internationally-recognised degree that boasts an exceptionally high graduate employment rate. At UQ, our focus is preparing you for a dynamic and successful career.

UQ’s Bachelor of Health, Sport and Physical Education (Honours) is the only degree in Queensland where you will complete a supervised, full-term (12 weeks) of practical placement in fourth year so you can hit the ground running when you graduate. There are also opportunities to gain teaching experience overseas through international exchanges and work placements. While you’re here you will learn and train in Olympic-standard recreational and sporting facilities at UQ and learn from some of the best health and physical education experts in the country.

What you will study
The Bachelor of Health, Sport and Physical Education (Honours) will prepare you for a career in health and physical education as well as sport education and related areas such as health promotion, sports coaching, and recreation and sports development. We focus on problem-based learning and engaging you in real-life situations. During the degree you will gain a strong foundation in the science of human movement from a variety of perspectives, including physiological, biomechanical, socio-cultural, psychological, educational and health.

In Years 3 and 4 you will learn how to teach health, sport and physical activities and put this into practice with placements at schools and community environments. In these placements you will work with students in a variety of settings including primary, secondary and special needs, and your 12-week placement in Year 4 will be within a school’s health and physical education (HPE) department. We focus on making your study fun, with lots of physical activity and team work. In your final year you will also undertake a research project under the guidance of an experienced researcher.

Your future in Health, Sport and Physical Education
There are many career options both in Australia and overseas in public or private schools, sporting academies, institutes or associations and outdoor education and recreation centres, such as:
- health and physical education teacher
- sports coach
- corporate health officer
- outdoor educator
- recreation manager
- health promotion officer
- director of physical performance
- sports administrative officer
- sporting association executive director
- sporting association media liaison officer
- sports journalist
- sports academies and institutes – coach/director of coaching
- junior science or maths teacher

Who will recognise your qualifications?
- Queensland College of Teachers: specialist teachers of physical education, health education and junior science.

Your postgraduate options
Coursework degrees available in:
- education
- clinical exercise physiology
- sports coaching
- physiotherapy
- occupational therapy
- speech pathology
- public health
- graduate entry medicine: see page 26 for more information.

Research degrees (MPhil and PhD) are also available in your area of interest. See page 50 for more information.

International students
This degree requires a higher level of English language proficiency than the UQ minimum. The IELTS requirements are an overall score of at least 7.5 with a score of 7.0 in reading and writing and 8.0 in speaking and listening. You are required as an international student to complete the degree on a full-time basis. See page 58 for more information.

Who else will recognise your qualifications?
- junior science or maths teacher
- sporting association media liaison officer
- sports journalist
- sports academies and institutes – coach/director of coaching
- junior science or maths teacher

Bachelor of HUMAN SERVICES

Study Human Services at UQ and get hands-on, practical experience so you will graduate confident and job-ready with 500 hours spent on placement during your degree. UQ’s Bachelor of Human Services offers you a unique opportunity to combine in-depth study in your area of interest with practical skills and techniques in human services.

Why Human Services at UQ?
Human Services is a rapidly growing industry with excellent employment opportunities in a range of services including government departments such as Child Safety Services, and in community and church-based organisations in both Australia and overseas. Study Human Services at UQ and you will receive the theory and practical knowledge for a challenging and rewarding career that addresses important social issues. You will learn from award-winning lecturers and researchers who are recognised as leaders in the field and gain invaluable hands-on, practical experience that will give you the skills and understanding to start your career in Human Services upon graduation.

What you will study
This degree offers you the unique opportunity of combining study in your field of interest with practical skills and knowledge about the Human Services industry. You can study up to eight courses in your preferred field and have this recognised as a major when you graduate. Your major is combined with skill-based courses and hands-on experience so you will graduate job-ready and well positioned to make a significant difference in your chosen profession.

Your placement will see you assigned to an organisation where you will get the chance to apply the knowledge you’ve learnt in your studies to gain firsthand, practical experience in the human services industry. These practical placements often lead to employment opportunities after graduation.

Majors include:
• Aboriginal and Torres Strait Islander Studies: learn from Aboriginal and Torres Strait Islander teachers as well as non-Indigenous staff who work closely with these communities
• Applied Psychology: study the application of psychology in areas such as mental health, the workplace, education or sport
• Criminology: learn to examine crime and its regulation in the context of social, economic and political shifts in our society
• Peace and Conflict Studies: understand the causes of political conflict and pathways to peaceful solutions
• Sociology: study social change, modern society and culture, social institutions and the relationship between people and the environment
• Public Policy: study institutions and processes involved in governance including the social, economic and ideological forces that contribute to the making of public policy.

Your future in Human Services
Human Services prepares you for a range of exciting careers such as:
• community corrections officer (Department of Justice and Attorney-General)
• youth development officer
• youth worker
• youth outreach and information worker
• child safety support officer
• community development officer
• community worker
• case manager
• case worker
• project officer
• program coordinator
• outreach worker.

Your postgraduate options
Honours is available as an additional year of study.
Human Services graduates can become fully qualified social workers after 18 months of study through UQ’s Master of Social Work Studies.
Postgraduate coursework study in counselling and other related fields
Research higher degrees (MPhil and PhD) in your area of interest are also available. See page 50 for more information.

International students
Standard UQ English language proficiency requirements apply for this degree. You are required as an international student to complete the degree on a full-time basis. See page 58 for more information.

More information
For further information on Human Services at UQ, see page 58 for more information.

Human Services at UQ:
See page 58 for more information.

ANTHEA
Human Services student

"When I first graduated from high school I was a little confused about which area I wanted to study. After a lot of travelling my eyes were opened to the importance of equality in our society which led me to a new-found passion in empowerment for women. I loved many of my courses, however, two that stood out were Social policy and Community development as they were fascinating and very insightful. I would absolutely recommend this program to anyone considering it as it has opened up so many pathways for me!"

Read more at: www.health.uq.edu.au/careers
Study UQ’s Bachelors of Human Services / Arts and you will graduate with two degrees to expand your career opportunities in an industry that’s constantly expanding. During your studies you will receive hands-on, practical experience with 500 hours spent on placement during your degree.

Why Human Services / Arts at UQ?

Human Service practitioners help everyday people in need. Professional practice in human services is complex, challenging and very rewarding as it’s about making a real difference in people’s lives and building a better world. It’s a rapidly growing industry with excellent employment opportunities in a range of services including government departments such as Child Safety Services, and in community and church-based organisations in both Australia and overseas.

Study Human Services / Arts at UQ and you will graduate with two degrees after just four years of full-time study. You will receive the theory and practical knowledge for a challenging and rewarding career that addresses important social issues. The Bachelor of Arts component allows you to choose from a wide variety of majors to either complement your human services studies or broaden your knowledge in another field to expand your career opportunities. Throughout the dual degree, you will learn from award-winning lecturers and researchers who are recognised as leaders in the field and gain invaluable hands-on, practical experience that will give you the skills and understanding to start your career in human services.

What you will study

You will learn about social issues and how they occur, as well as the theory, professional ethics and values that are the foundation of human services. In order to develop your skills and abilities, you will undertake two professional placements in community-based human service agencies. These work placements help secure employment for many students and meet the accreditation guidelines of the Australian Institute of Welfare and Community Workers Inc.

This dual degree gives you the unique opportunity to combine an in-depth study into your field of interest with practical skills and knowledge about the human services industry. You can choose from a wide variety of majors available through UQ’s reputable Arts program to either complement your human services studies or broaden your knowledge in another field. Throughout the degree you will receive a range of skill-based courses and receive hands-on experience to broaden your knowledge and skills and be well positioned to make a significant difference in your chosen profession. Your placement will see you assigned to an organisation where you will apply the knowledge you’ve learnt in your studies to gain firsthand, practical experience.

 Majors include:

The dual degree will allow you to choose an extended major, a second major (45 options available) or create your own combination of majors and minors. Majors include:

- Aboriginal and Torres Strait Islander Studies: learn from Aboriginal and Torres Strait Islander teachers as well as non-Indigenous staff who work closely with these communities
- Applied Psychology: study the application of psychology in areas such as mental health, workplace, education or sport
- Criminology: learn to examine crime and its regulation in the context of social, economic and political shifts in our society
- Peace and Conflict Studies: understand the causes of political conflict and pathways to peaceful solutions
- Sociology: study social change, modern society and culture, social institutions and the relationship between people and the environment
- Public Policy: studies institutions and processes involved in governance, including the social, economic and ideological forces that contribute to the making of public policy.

Your future in Human Services / Arts

The Bachelor of Human Services / Arts prepares you for a range of exciting careers paths including:

- community corrections
- Indigenous communities
- child and family welfare
- mental health
- services for the older population
- community development
- housing and homelessness services
- women’s services
- counselling and personal support
- working with refugees and immigrants.

Your postgraduate options

- Honours is available as an additional year of study in either the Human Services or Arts fields
- Human Services graduates can become fully qualified social workers after 18 months through UQ’s Master of Social Work Studies
- Postgraduate coursework study is available in counselling, arts and other related fields
- Research higher degrees (MPhil and PhD) are also available in counselling, arts and other related fields
- Research Higher degrees (MPhil and PhD) are also available in your area of interest, see page 50 for more information.

International students

Standard UQ English language proficiency requirements apply for this degree. You are required as an international student to complete the degree on a full-time basis. See page 58 for more information.

“Initially decided upon my dual degree when I discovered that I could major in Criminology. I found that the values of the Human Services component complement those of Criminology which offered me the opportunity to think more broadly and critically analyse the ideas, discussions and research in this field. The best advice I could pass onto a new student is to pick an area which interests you and you are passionate about and from there you will develop your skills and find your niche. Follow things that interest you and be open to them leading you to new directions which you may not initially thought of.”

www.health.uq.edu.au/careers
Why Medicine at UQ?
UQ is one of the top four medical schools in Australia. The UQ School of Medicine has seen more than 12,000 highly skilled doctors graduate who are well equipped to meet today’s medical challenges. Our graduates are world-class and, with clinical schools outside Australia including the USA and Brunei, more than 80 per cent of students complete an elective overseas. Early patient contact and clinical training will help you develop advanced clinical skills and medical knowledge. The curriculum has been developed to capture the enthusiasm and maturity of our graduate entrants and help them become highly skilled medical graduates capable of undertaking the variety of career options open to them worldwide.

What you will study
In Phase One, the first two years of the program, you will gain a strong foundation of knowledge, research, training and skills in preparation for clinical practice. Phase Two (Years 3 and 4) is the clinical practice phase with 10 core clinical rotations. Early patient contact and clinical training will equip you with advanced clinical skills, research and medical knowledge and ensure you will be ready for a rewarding career when you graduate. We focus on case-based and group learning, where you will work cooperatively on a carefully planned series of patient-centred problems designed to highlight principles and issues in health and disease. The program’s key features include the simultaneous learning of clinical, biological and social sciences, and incorporates a focus on ethics and professional development. Following learning approaches, communication skills, information technology and computing skills.

Your future in Medicine
Medical practitioners work in a variety of areas including private practice, public health, academia and teaching, research, aid organisations, the defence forces or a combination of the following: medical specialisations in academia, accident and emergency, anaesthesia, dermatology, general practice, intensive care, medical administration, general medicine, cardiology, obstetrics and gynaecology, occupational medicine, ophthalmology, paediatrics, pathology, histopathology, microbiology, psychiatry, radiology, rehabilitation medicine, sexual health, sports medicine, surgery (general, neurosurgery, etc).

Who will recognise your qualifications?
• Medical Board of Australia
• Specialist college registration with further study, training and successful admission.

Entry requirements
• Doctor of Medicine Provisional Entry for School Leavers guarantees a place in the MD at UQ, subject to completion of any UQ bachelor degree (subject to meeting prerequisites) within the minimum time permitted with an overall Grade Point Average (GPA) of 5.0. Applicants must have Year 12 (or equivalent) English, OP 1 (or equivalent) and complete Year 12 and the Undergraduate Medicine and Health Sciences Admissions Test (UMAT) in the year of application. See www.umat.acer.edu.au.
• Doctor of Medicine Direct Entry for Graduates must achieve a GPA of 5 in latest degree (minimum three year bachelor degree) and successfully complete the Graduate Medical School Admissions Test (GAMSAT). See www.gamsat.acer.edu.au

Supplementary information
Alternative entry for Indigenous students: special entry scheme to increase participation of Aboriginal and Torres Strait Islander students studying medicine. See www.atise.uq.edu.au/applying-to-uq

The Bonded Medical Places Scheme:
Australian Government Initiative to address doctor shortage outside metropolitan areas across Australia. Twenty-five per cent of all Commonwealth Supported Places are allocated to the scheme. If you accept an offer under this scheme you will commit to working in an area of workplace shortage for a period of time after completing your degree. See www.health.gov.au/bmpscheme

Rural background students (RBS): Australian Government Initiative to improve access to medical services within rural Australia. Twenty-five per cent of places each year will be designated to applicants from a rural background. You will be eligible for consideration if you have spent at least five years living in a rural Australian area since beginning primary school, as determined by the Australian Standard Geographical Classification – Remoteness Area system. See www.uq.edu.au/study/admissions

International students
See www.uq.edu.au/international students for entry requirements and application details.

More information

Phone: +61 7 3365 2003

Study Medicine at UQ and you will join the largest and one of the best medical schools in Australia. With more than 3500 hours of clinical placement during your degree, you will gain hands-on experience, advanced skills and knowledge to help you graduate well-prepared for a successful medical career.

Doctor of MEDICINE (MD)
Study Midwifery at UQ and get hands-on, practical experience with more than 1000 clinical hours spent on placement during your degree. Start your clinical placement in your first semester of study, so you graduate highly skilled, confident and ready for a rewarding career as a midwife.

The Bachelor of Midwifery can also be undertaken as a dual degree with a Bachelor of Nursing.

Why Midwifery at UQ?
Midwifery is an exciting, challenging and rewarding career in which you can celebrate the very essence of human life. Midwives care for women during pregnancy, labour and birth, and after their baby is born. Study Midwifery at UQ and you will start your practical experience in the fifth week of your first semester, which means you will be more than ready to step into a midwifery career when you graduate. Our balance of clinical practice and academic theory means Midwifery at UQ is held in high regard professionally. We’ve developed the degree in consultation with the health and midwifery industry, so you will learn the most relevant, up-to-date theory and hands-on practical experience to help you be job-ready when you graduate. You can also gain a competitive edge by undertaking the accelerated 2.5 year option.

What you will study
Our innovative model of clinical practice means you will gain hands-on, real experience from the earliest stages of your degree. You can choose a clinical school where you will be based these days a week and learn in small groups. We’ve structured the degree so that your learning is focused around integrated problem solving so you can apply your clinical knowledge and theoretical understanding in a variety of contexts. Add this to the extensive practical experience you will receive from your first semester of study, and you will graduate fully equipped and confident to start your career as a midwife.

Once you successfully finish the degree, you will be eligible to apply for registration as a midwife through the Nursing and Midwifery Board of Australia. An Honours year can also be done once your bachelor degree is completed.

The Bachelor of Midwifery can also be undertaken in a dual degree with the Bachelor of Nursing. See page 30 for details.

What you will learn at clinical school
During your degree, you will be given the opportunity to experience “follow throughs”. This means you will be involved in an ongoing relationship with expectant mothers, beginning with the initial contact in early pregnancy through to the time during and immediately after the birth in both community and hospital settings. This unique opportunity will allow you to experience continuity with individual women through pregnancy, labour, birth and the postnatal period.

Your future in Midwifery
A career in midwifery will allow you to work in a variety of maternity and neonatal settings including: public, private or community healthcare; clinical practice in metropolitan, regional, rural or remote settings in both Australia and overseas; academia/clinical teaching; health research; health service management; and aid organisations.

Who will recognise your qualifications?
• Nursing and Midwifery Board of Australia registration as a midwife
• Australian College of Midwives.

Your postgraduate options
• Honours available as an additional year of study
• Postgraduate coursework study is available in Midwifery. See page 48 for more information
• Research degrees (MPhil and PhD) are also available in your area of interest. See page 50 for details.

International students
This degree requires a higher level of English language proficiency than the UQ minimum. The ELTS requirements are an overall score of at least 7.0 with a score of 7.0 in reading, writing, speaking and listening. You are required as an international student to complete the degree on a full-time basis. See page 58 for more information.

Important information
Carriers of blood-borne transmissible viruses (e.g. Hepatitis B, Hepatitis C and HIV) are not eligible to study this degree. Students must also complete post-admission requirements prior to clinical placement, see www.health.uq.edu.au/admissionreqs for more information.

More information
For further information on Midwifery at UQ: www.msw.uq.edu.au
Email nmsw@uq.edu.au
Phone +61 7 3365 2068

“Prior to commencing study I volunteered at a maternity hospital in Sri Lanka for six weeks. This experience was invaluable and provided me with the drive and motivation to apply to UQ. It was exciting and rewarding journey to complete my degree and I have become very passionate about supporting women throughout their pregnancy, birth and postnatal period. While studying I was lucky enough to secure a placement at Ipswich Hospital for the three years of my degree within the maternity department. I am now working as a Registered Midwife at Ipswich Hospital and am looking forward to consolidating my skills and knowledge throughout my graduate year.”

Bachelor of MIDWIFERY
Bachelor of NURSING

UQ’s Bachelor of Nursing is highly regarded by the health industry in Australia and overseas due to its extensive practical experience throughout the entire degree. Get hands-on experience with your clinical placement, starting from your first semester. You will complete more than 1000 hours on placement during your degree.

The Bachelor of Nursing can also be undertaken as a dual degree with a Bachelor of Midwifery.

Why Nursing at UQ?
Nursing is an exciting, diverse and rewarding career in which you can make a true difference in people’s lives. Qualified nurses are always in high demand and there’s a wide range of career options, from working in public or private hospitals to community health care, aid organisations and regional healthcare. Study Nursing at UQ and you will start your practical experience in the fifth week of your first semester, which means you will be ready to confidently step into a nursing career upon graduation. Nursing at UQ is held in high regard within industry, due to the balance of clinical practice and academic theory in the degree. You will be taught by our practising clinicians who have a wealth of nursing experience and you will have lectures one day and clinical placement three days a week. We’ve developed this degree in consultation with the health and nursing industry, which means you will learn the most relevant, up-to-date theory and receive hands-on experience to help you be job-ready when you graduate. You can also give yourself a competitive edge by graduating six months early if you choose the accelerated 2.5 year option.

What you will study
Our innovative model of clinical practice means you will gain hands-on, real experience from the earliest stages of your degree. You can preference a clinical school where you will be based three days a week and learn in small groups. We’ve structured the degree so that your learning is focused around integrated problem solving so you can apply your clinical knowledge and theoretical understanding in a variety of contexts. Add this to the extensive practical experience you will receive from your first semester of study, and you will graduate confident to start your career as a nurse. You can undertake an Honours year once your bachelor degree is completed if you wish. The Bachelor of Nursing can also be undertaken in a dual degree with the Bachelor of Midwifery degree. See page 30 for details.

Location
The degree is delivered through small group teaching three days a week at clinical schools, with lectures one day a week at a UQ location which will include St Lucia and Wooloongabba. You will nominate your preference for a clinical school when you complete your QTAC application form.

• QTAC code (South East QLD Clinical Schools) 728002
• QTAC code (Mater Clinical School) 728502

Delivery mode Internal
Honours Available on completion of Bachelor degree (one year full-time or part-time equivalent) as an extra year of study
International availability Yes (CRICOS 05045E).
Clinical placement Students must also complete post-admission requirements prior to starting clinical placements. See www.health.uq.edu.au/admissionsreqs.

What you will learn at clinical school

Location
The degree is delivered through small group teaching three days a week at clinical schools, with lectures one day a week at a UQ location which will include St Lucia and Wooloongabba. You will nominate your preference for a clinical school when you complete your QTAC application form:

• QTAC code (South East QLD Clinical Schools) 728002
• QTAC code (Mater Clinical School) 728502.

Clinical schools are subject to final approval. Every effort is made to place students in their preferred location which may include a travel radius of up to 90 minutes due to public transport connections. Costs associated with travel and possible loss of income over this period will not be reimbursed.

What you will learn at clinical school
You will learn how to conduct patient assessments in pain and nutrition, as well as taking vital signs. You will also learn general patient care, including patient hygiene and management of the ill, and then progress to administration of medication and advanced nursing skills. You can select specialist areas for your fifth semester, including accident and emergency units, paediatrics, mental health and rural nursing including the Royal Flying Doctor Service and peri-operative nursing.

Your future in Nursing
A career in nursing enables you to work in various healthcare settings including:

• public, private or community
• clinical practice (metropolitan and rural)
• research, academic and clinical teaching
• medical/surgical nursing
• aged care and community
• critical care and emergency
• drug and alcohol nursing or education
• peri-operative
• paediatrics and child health.

Who will recognise your qualifications?
Nursing and Midwifery Board of Australia registration as a nurse
Royal College of Nursing Australia
UG Nursing graduates can also apply for registration in Canada.

Your postgraduate options
Honours available as an additional year of study
Postgraduate coursework study is available in mental health nursing, nurse practitioner studies and specialist nursing fields such as aged care, children, chronic disease, palliative care, paediatric/neonatal intensive care, rural and remote nursing.
Research Higher degrees (MPH and PhD) are also available in your area of interest. See page 50 for more information.

International students
This degree requires a higher level of English language proficiency than the UQ minimum. The IELTS requirements are an overall score of at least 7.0 with a score of 7.5 in reading, writing, speaking and listening. As an international student you are required to complete the degree on a full-time basis. See page 51 for more information.

Important information
Carriers of blood-borne transmissible viruses (e.g. Hepatitis B, Hepatitis C and HIV) have limited practice options available for this degree. Students must complete post-admission requirements prior to clinical placement, for more information see www.health.uq.edu.au/admissionsreqs.

Why Nursing/Midwifery at UQ?
Nursing and midwifery are exciting, diverse and rewarding careers where you can make a true difference in people’s lives. Study Nursing/Midwifery at UQ and you will start your practical experience in the fifth week of your first semester, giving you the hands-on experience necessary for your Nursing/Midwifery career. Nursing/Midwifery at UQ is held in high regard professionally, due to the balance of clinical practice and academic theory in the degree. You will be taught by our practising clinicians who have a wealth of nursing and midwifery experience, and you will have lectures one day and clinical placement three days a week. We’ve developed this degree in consultation with health industry professionals, which means you will learn the most relevant, up-to-date theory and receive hands-on experience to help you be job-ready when you graduate. You can also gain a competitive edge by graduating six months early if you choose the accelerated 3.5 year option. That’s two degrees in just 3.5 years!

What you will study
Our innovative model of clinical practice means you will gain hands-on, real experience from the earliest stages of your degree. In the first three years, your lectures and problem-based tutorials will be incorporated with clinical experience in your chosen clinical school. In your final year you will undertake an extensive clinical placement, exposing you to a specialty area of midwifery and midwifery practice and the opportunity to refine your skills to meet national competency standards for nurses and midwives. The problem-based learning model that’s a key feature of the Nursing/Midwifery degrees is also carried into the dual degree, and is informed by international best practice and industry experts to respond to current national and global population health challenges.

Location
The degree is delivered through small group teaching three days a week at clinical school, with lectures one day a week at a UQ location which will include St Lucia and Wooloongabba. You will nominate your preference for a clinical school when you complete your QTAC application form.

• QTAC code (South East Qld Clinical Schools) 728602
• QTAC code (Mater Clinical School) 728602

Clinical schools are subject to final approval. Every effort is made to place students in their preferred location which may include a travel radius of up to 90 minutes due to public transport connections. Costs associated with travel and possible loss of income over this period will not be reimbursed.

What you will learn at clinical school
The dual degree has been specifically designed to give you a broad set of skills in nursing and midwifery. You will graduate well-prepared and ready to work in both midwifery and nursing including public health and education, rural and community hospitals, tertiary centres and other services that require a health professional who is both a registered nurse and a registered midwife.

Your future in Nursing and Midwifery
As a registered nurse and midwife, you can work as a nurse and a midwife either independently or together in a variety of areas including:

• public, private or community healthcare
• clinical practice (metropolitan and rural)
• maternity and neo-natal care
• academia/clinical teaching or research
• health research
• health service management
• defence forces
• Australian and international aid organisations.

Who will recognise your qualifications?
• Nursing and Midwifery Board of Australia registration as a nurse and midwife
• Australian College of Midwives
• Royal College of Nursing Australia.

Your postgraduate options
• Honours available as an additional year of study in either the Nursing or Midwifery fields
• Postgraduate coursework study is available in midwifery, mental health nursing, nurse practitioner studies and other specialist nursing areas
• Research degrees (MPhil and PhD) are also available in your area of interest. See page 50 for more information.

International students
This degree requires a higher level of English language proficiency than the UQ minimum. The ELTS requirements are an overall score of at least 7.0 with a score of 7.0 in reading, writing, speaking and listening. You are required as an international student to complete the degree on a full-time basis. See page 58 for more information.

Important information
If you are a carrier of blood-borne transmissible viruses (e.g. Hepatitis B, Hepatitis C and HIV) you are not eligible to study this dual degree. Students must also complete post-admission requirements prior to clinical placement, for more information see www.health.uq.edu.au/admissionreqs

UQ’s Bachelors of Nursing / Midwifery give you extensive practical experience to let you graduate with two degrees from one of Australia’s leading nursing schools. Get hands-on experience with your clinical placement, starting from your first semester. You will complete more than 1000 hours on placement during your degree.
Bachelor of

**OCCUPATIONAL THERAPY (HONOURS)**

UQ’s Bachelor of Occupational Therapy has a global reputation for its high quality graduates and long tradition of teaching and research excellence. Study Occupational Therapy at UQ and get hands-on, practical experience with more than 1000 hours spent on placement during your degree.

**What is Occupational Therapy?**

Occupational Therapists help people of all ages to improve their quality of life and overcome factors which affect their everyday activities. They use assessment and treatment to develop, recover or maintain the daily living and work skills of people affected by injury or illness, psychological or emotional difficulties, developmental delays or ageing. Occupational therapists focus on working with individual clients to identify and eliminate environmental barriers to independence and participation in daily activities. They do this through a range of treatment strategies designed to enhance the client’s ability, such as modifying the task or environment, skill development and / or education.

Occupational therapists often work closely with professionals in physiotherapy, speech pathology, education, nursing, social work and within the community.

**Why Study Occupational Therapy at UQ?**

Study UQ’s Bachelor of Occupational Therapy (Honours) and you will learn from leaders in the industry and graduate with a degree that is highly regarded in Australia and around the world. You will get hands-on, practical experience which will allow you to graduate well prepared and skilled to start your occupational therapy career and make a difference to the lives of others. To ensure you are competent you will experience more than 1000 hours on placement during your degree.

**What you will study**

The Bachelor of Occupational Therapy (Honours) combines a balance of theory and clinical practice to prepare you for a rewarding career. During your studies you will learn theoretical and practical studies in occupational therapy, combined with biological and behavioural sciences. In second year you will develop this knowledge and apply theory to practical problems of occupational therapy. In your third year you will focus on occupational therapy techniques, with clinical practice in teaching units in hospitals, schools, private practice and community health agencies. Clinical practice continues into your final year, where you will also examine professional issues and evidence-based practice in occupational therapy. You will also undertake studies in statistics and research techniques.

**Your future in Occupational Therapy**

There are many career options both in Australia and overseas, including:

- public and private hospitals
- community health centres and agencies
- rehabilitation units (medical, psychiatric, vocational)
- primary and secondary schools
- private practice
- industrial and government institutions
- nursing homes
- psychiatric clinics and hospitals
- residential and rehabilitation centres for people with intellectual disabilities
- research institutions.

**Who will recognise your qualifications?**

- Australian Association of Occupational Therapists
- Occupational Therapy Board of Australia
- World Federation of Occupational Therapists.

**International students**

This degree requires a higher level of English language proficiency than the UQ minimum. The IELTS requirements are an overall score of at least 7.0 with a minimum score of 7.0 in reading, writing, speaking and listening. You are required as an international student to complete the degree on a full-time basis. See page 58 for more information.

**More information**

“From an early age I have always wanted to be in a profession which benefits others, and I could not think of anything more rewarding than improving someone’s independence. Since studying Occupational Therapy at UQ I have discovered that there are many different areas which you can specialise in which I was lucky enough to experience whilst on placement – including acute wards (e.g. medical, cardiac and surgical), children’s mental health and outpatient therapy. I now have secured a graduate position at the Princess Alexandra Hospital and can honestly say I love going to work.”

Pharmacy program*

Study Pharmacy at UQ and get hands-on, practical experience with 385 hours spent on placement during your degree to give you the knowledge and skills to graduate ready to start your pharmacy career. UQ is the highest ranking Australian university with a Bachelor of Pharmacy program*. Why Pharmacy at UQ?

UQ’s School of Pharmacy is the largest and longest-established in Queensland, with more than 50 years of teaching and research excellence and a global network of more than 5000 graduates. Study Pharmacy at UQ and you will learn at the $100 million Pharmacy Australia Centre of Excellence (PACE) which is dedicated to pharmacy education and research. PACE is located in Queensland’s world-class biomedical science precinct at Woolloongabba. Our graduates are at the forefront of the pharmacy profession and form a committee of industry leaders from community and hospital pharmacy. UQ Pharmacy also has one of the highest graduate employment rates of any bachelor degree in Australia*, and is your pathway to a rewarding and exciting career.

What you will study

The Bachelor of Pharmacy (Honours) combines a balance of theory and clinical education to prepare you for a dynamic career. During the degree you will complete foundation studies in pharmacy, chemistry, biology, physiology and anatomy, learn about over-the-counter medications, the Australian health system and community pharmacy practice. You will study the legislation that governs the industry, how drugs act on the human body, learn how to dispense prescriptions, and from your first year you will develop important counselling skills in one of the School’s six simulated pharmacies. You will also experience the latest advances in pharmacy technology when you try our medicines dispensing robot. As well as strengthening your skills in the use of medicines to assist individual clients, you will study business management to develop your skills in running the business aspects of a community pharmacy or similar duties in a hospital pharmacy. You will cover strategic, financial, inventory and people management, as well as current professional issues relating to pharmacy practice.

Opportunity to undertake a major in your final year

If you are suitably qualified (confirmed based on grade point average), you can choose the Clinical and Experimental Therapeutics major in your final year. You will work under the guidance of one of the School’s experienced researchers and design and conduct your own research project in one of the School’s many research areas.

Practical placements

Your practical experience starts in your first year and continues throughout the degree. You can gain experience in more than 500 community pharmacies or hospitals throughout rural and metropolitan Australia and overseas. As part of the eight weeks spent on placement in your final year, you will also spend at least four weeks undertaking a short research activity in either a community or hospital pharmacy or another area that promotes effective and efficient use of medicines.

Your future in Pharmacy

With one of the highest graduate employment rates of any bachelor degree in Australia, UQ’s Bachelor of Pharmacy (Honours) leads to careers in:

- Community pharmacy, where you provide primary healthcare through identification and treatment of common ailments, dispense prescriptions, give medication advice, promote community health and illness prevention and healthy lifestyle choices
- Hospital pharmacy, where you will prepare and supply medicines, provide drug information to healthcare professionals and educate and advise clients, doctors and nurses on the appropriate and safe use of medicines
- Industrial pharmacy, where you will be involved in the manufacture, quality control, clinical trials and registration and marketing of pharmaceutical products.

Your postgraduate options

Postgraduate coursework options include:

- Graduate Certificate in Clinical Pharmacy**
- Graduate Diploma in Clinical Pharmacy
- Master of Clinical Pharmacy
- Graduate Certificate in Pharmacy Practice (incorporating the Intern Training Program). See page 49 for more information.

International students

This degree requires you to have a higher level of English language than the UQ minimum. The IELTS requirements are an overall score of at least 7.0, with a score of 6.0 in reading, writing, speaking and listening. You are required as an international student to complete the degree on a full-time basis. See page 58 for more information.

*The small group learning activities in tutorials, where we practice dispensing medicines and counselling patients, gave us a huge advantage when going on placements in community pharmacies. We gained skills in providing relevant information to actual patients and how to handle their health concerns. PACE offers a great learning environment with bright spacious laboratories, a comfortable modern lecture theatre, great study spaces, and access to plenty of computers and medical pharmaceutical reference books.*

Bachelor of PHYSIOTHERAPY (HONOURS)

Study UQ’s Bachelor of Physiotherapy (Honours) and you will learn from some of the best clinical educators and lecturers in one of the longest established and most reputable physiotherapy degrees in Australia. Study Physiotherapy at UQ and get hands-on, practical experience with more than 1200 hours of supervised practice spent on clinical training during your degree.

Why Physiotherapy at UQ?
Study UQ’s Bachelor of Physiotherapy (Honours) and you will learn from the best clinical educators and lecturers in one of the most established and reputable physiotherapy degrees in Australia. Physiotherapists help people who have pain or loss of function as a result of physical injury or disorder, and people with physical disabilities. As a physiotherapist you will care for people with musculoskeletal, neurological, respiratory, cardiovascular and other conditions, using techniques to reduce pain, improve movement and restore muscle control for better motor performance and function. Study Physiotherapy at UQ and you will broaden your career options with qualifications that are recognised worldwide, with award-winning lecturers and clinical educators who are among the best in the country. At UQ, our focus is preparing you for a dynamic career and our extensive practical placements program gives you the knowledge and skills to prepare you for a rewarding career in physiotherapy.

What you will study
The Bachelor of Physiotherapy (Honours) will give you the knowledge, skills and attitude to prepare you for an exciting career where you can make a difference to people’s lives. You will complete foundation studies in basic applied medical and physiotherapy sciences, as well as understanding human structure, function and behaviour. You will then go on to focus on the theory and practice of physiotherapy including prevention, clinical reasoning and diagnosis, the therapeutic management of pain, disorders of movement and enhancing the health and welfare of people of all ages.

The UQ Physiotherapy difference is our focus on practical, clinical experience where you will interact with people of diverse ages, backgrounds and requirements in your last two years of study. Your education will be directed by the latest research outcomes and developments in the physiotherapy industry with access to our state-of-the-art equipment and resources.

Your future in Physiotherapy
Career opportunities for physiotherapists are extensive, and include:
- public and private hospitals
- community health centres and agencies
- rehabilitation units
- preschool and school programs
- private practice, offering treatments to a full range of clients or specialising in areas such as sports physiotherapy, musculoskeletal physiotherapy, paediatrics, obstetrics and orthopaedics
- researchers, advisors or consultants in educational, industrial or government institutions.

Who will recognise your qualifications?
- Australian Physiotherapy Association
- Physiotherapy Board of Australia.

Your postgraduate options
- Specialty coursework masters in fields of musculoskeletal and sports physiotherapy. See page 50 for more information
- Research higher degrees (MPH and PhD) in your area of interest are also available. See page 50 for more information.

International students
This degree requires you to have a higher level of English language than the UQ minimum. The IELTS requirements are an overall score of at least 7.0, with a score of 7.0 in reading, writing, speaking and listening. Physiotherapy student
MATTHEW

"From playing rugby in high school I became interested into how a physiotherapist could help me to improve my performance on the field. Although I wasn’t sure exactly what I wanted to do when I graduated I knew I wanted to learn about anatomy and physiology which led me to Physiotherapy at UQ. To date the most valuable experiences I have had are the off-campus visits and clinical immersions and this year I am looking forward to my full-time placement. My top tip for any new student is to actively meet the challenges of the program head on and use your friends as support.”

Bachelor of
PSYCHOLOGICAL SCIENCE

Study Psychology at UQ and you will be able to tailor your degree to suit individual career aspirations with more than 50 specialty subjects in areas and specialities that suit you. UQ’s Bachelor of Psychological Science has a world-class reputation built on excellence in teaching, research and service to the community.

### Why Psychology at UQ?
You can study psychology at UQ through the Bachelor of Arts (BA), Bachelor of Science (BSc) or Bachelor of Psychological Science (BPsySc) degrees. The BA and BSc give you the opportunity to study psychology in combination with other areas. Psychology is the scientific study of how people behave, think and feel. A broad discipline, it examines brain function, memory, conscious experience, lifespan development, social behaviour and the range of functional and dysfunctional behaviour. Study Psychology at UQ and you will develop analytical skills which are relevant to many careers, and you will learn from award-winning lecturers and researchers who are recognised as leaders in psychology.

### What you will study
The Bachelor of Psychological Science will provide the knowledge and skills to prepare you for an exciting career with extensive employment opportunities. You will complete foundation studies in psychological theory, research and practice that focus on child development, neuroscience, learning and cognition, social and organisational psychology, psychological assessment, psychological research methods and evaluation of research. In your third year you will choose advanced electives from your chosen area of specialisation.

### Your future in Psychology
Psychology prepares you for a range of exciting careers that require superior problem-solving, critical thinking and understanding of human behaviour, including human resource management, mental health services, youth work, relationship counselling, residential care work, family and social services, public service management, private sector administration and management, market research, disabilities services, juvenile justice and corrective services, advertising and statistical research positions. If you’re contemplating a career as a psychologist, you should undertake the four-year degree, either the four-year Bachelor of Psychological Science with Honours, or the three-year Extended Major in the Bachelor of Arts or Bachelor of Science followed by an Honours year. All are accredited with the Australian Psychological Accreditation Council. To gain full registration as a psychologist with the Psychology Board of Australia, you will need to complete postgraduate studies and/or supervised work experience.

### Postgraduate degrees
Postgraduate degrees include:
- Master of Applied Psychology, with the option of specialising in Counselling, Health or Sport and Exercise Psychology
- Master of Clinical Psychology
- Master of Organisational Psychology
- Doctor of Psychology

Research higher degrees in your area of interest are also available. See page 50 for more information.

### International students
Standard UQ English language proficiency requirements apply for this degree. You are required as an international student to complete the degree on a full-time basis. See page 58 for more information.

Study UQ’s Bachelor of Social Work and receive extensive practical experience so you can graduate with a degree that’s held in high regard in Australia and around the world. Study Social Work at UQ and get hands-on, practical experience with 1000 hours spent on placement during your degree.

Why Social Work at UQ?
If you’re interested in a career where you will make a real difference to the lives of individuals, families and communities to address social issues and social policy, then Social Work is for you. Social work and social policy play a very important role in Australia where we face issues such as unemployment, the ageing population and uncertainty in the economy. Social workers play a vital role in developing a society based on social justice and identifying situations that disadvantage people, as well as helping people who need support in their personal lives. Study Social Work at UQ and you will learn from some of the leaders in the field who write the social work textbooks used by other universities around Australia. This means our teaching is founded on a wealth of experience, expertise and leading research which is adapted to meet the needs of our students. We’ve created this degree in consultation with industry, which means you will learn the most relevant, up-to-date theory and gain hands-on experience to make sure you’re job-ready when you graduate.

What you will study
The Bachelor of Social Work combines core knowledge and skills in social work, social policy and research practice. You will gain an understanding of the legal context of social work practice, human development, the moral and ethical foundations of social work, and the theories that guide what social workers do in the workplace. In your third and fourth years you will complete practical placements where you will gain hands-on experience in the social work industry from experienced practitioners. You can even do your placement in an overseas agency. These placements provide an excellent opportunity to apply the theory and knowledge you’ve learned during your degree to a real workplace environment.

You will also have the opportunity to specialise in a key area of practice in social work by choosing a minor in:
- Child, Youth and Family
- Health and Ageing
- Mental Health

Your future in Social Work
Employment opportunities in social work are excellent, with the Department of Employment projecting job growth of 48.5 per cent over the next five years. Many social workers practise in a variety of areas during their careers, including government agencies, child protection, drug and alcohol support clinics, Indigenous health and welfare agencies, residential care, community organisations, private practice and many other organisations, in roles such as:
- advocates or negotiators acting for people facing discrimination or unable to act for themselves
- community workers in local government or community organisations to bring about change and develop community support services
- in hospitals to help patients and their families cope with and adjust to their health conditions
- with individuals and families facing personal distress or crisis associated with family and personal relationships
- with those experiencing the loss of health or employment due to disability
- planning and management of social and welfare services in local, State and Federal government departments
- family therapists.

Some of our more experienced graduates are CEOs of government and non-government organisations, policy officers, community development workers, international aid workers, family therapists, probation officers and juvenile justice workers.

Your postgraduate options
- Master of Counselling; see page 49
- Research higher degrees (MPhil and PhD) in your area of interest are also available. See page 50 for more information.

Who will recognise your qualifications?
- Australian Association of Social Workers (AASW) - University of Queensland Bachelor of Social Work graduates are eligible for full membership on completion of the degree.

International students
This degree requires you to have a higher level of English language than the UQ minimum. This IELTS requirements are an overall score of at least 7.0, with a score of 7.0 in reading, writing, speaking and listening. You are required as an international student to complete the degree on a full-time basis. See page 58 for more information.

Bachelor of SPEECH PATHOLOGY (HONOURS)

UQ’s Bachelor of Speech Pathology (Honours) is recognised around Australia and across the world for its award-winning teachers and experienced graduates. Study Speech Pathology at UQ and get hands-on, practical experience with more than 600 hours spent on placement during your degree.

Why Speech Pathology at UQ?
Speech Pathology is the management of communication and/or swallowing difficulties as the result of problems with speech, language, voice, fluency (stuttering), hearing or literacy. Speech Pathologists enjoy challenging and rewarding careers by working in a variety of settings including hospitals, schools and community health centres to deliver services such as individual therapy, group therapy, classroom support programs and home visits for clients and carers.

Speech Pathologists help people of all ages, from children to adults, with communication problems due to disease or injury such as stroke, hearing loss, brain damage, Intellectual disability or stuttering. They also work with clients who have feeding or swallowing problems.

Study the internationally acclaimed Speech Pathology degree at UQ and you will learn from award-winning teachers and clinical educators who are among the best in Australia. At UQ, our focus is preparing clinical educators who are among the best in the world for its award-winning teachers and experienced graduates.

What you will study
The Bachelor of Speech Pathology (Honours) will give you the knowledge, skills and attitude to prepare you for an exciting career with extensive employment opportunities in speech pathology.

You will complete foundation studies in anatomy, linguistics, physiology and psychology, and learn all about communication disorders of the voice, fluency, hearing, speech, language and oral function. Years 2 to 4 of your studies are case and problem-based and integrate the understanding of communication disorders with assessment and management of clients.

With more than 200 locations available for your practical placements – such as public/private hospitals, community health centres, schools, disability services, private practices and non-government organisations – you will be more than ready for a career in speech pathology when you graduate. Your education will be directed by the latest research outcomes and developments in the speech pathology industry and you will learn with our state-of-the-art equipment and resources.

Your future in speech pathology
Speech pathologists work in a variety of areas, including:
- public and private hospitals, working with people of all ages including children and seniors
- community health centres and agencies
- rehabilitation units
- preschools, kindergartens and childcare centres for people with hearing impairment and/or intellectual disability
- private practice
- industry and government institutions.

Who will recognise your qualifications?
- Speech Pathology Australia
- Speech Pathologists Board of Queensland.

Your postgraduate options
Research higher degrees (MPhil and PhD) in your area of interest are available. See page 50 for more information.

International students
This degree requires you to have a higher level of English language than the UQ minimum. The IELTS requirements are an overall score of at least 7.0, with a score of 7.0 in reading, writing and listening, and a score of 8.0 in speaking. You are required as an international student to complete the degree on a full-time basis. See page 58 for more information.

More information
For further information on Speech Pathology at UQ, see page 58 for more information.

Email enquiries.shrs@uq.edu.au
Phone +61 7 3365 4506

“The Speech Pathology at UQ has provided me with very valuable clinical placements. During placements you are given the opportunity to bring the theoretical knowledge into practical application. It is through the clinical placements that you acquire the skills needed to be a good clinician; hands-on experience is the best!”

EXPAND YOUR HORIZONS

“Exchange is an experience that is so valuable, not only for developing your career, but for every aspect of your life. You learn so much about yourself and those around you by living in a new location and having to adapt to different teaching methods. I really feel ready to tackle the workforce now. I would strongly encourage students to take up such a fantastic opportunity provided by UQ. With the world becoming smaller every year and the global economy becoming more and more important, the competitive edge that cultural competence gives you is imperative. Exchange is a fantastic and fun way to build these valuable skills!”

NATALIE
UQ Abroad participant at Uni of St Gallen, Switzerland

STUDY OVERSEAS

Through UQ’s student exchange program, UQ Abroad, you can study overseas for up to one year while gaining credit towards your UQ degree – and have the adventure of a lifetime!

www.uq.edu.au/uqabroad

Study overseas through UQ Advantage Office

Through UQ’s student exchange program, UQ Abroad, you can study overseas for up to one year while gaining credit towards your UQ degree. With almost 200 exchange partners in 40 countries, exchange is an ideal way to combine study, travel, and have the adventure of a lifetime. Improve your foreign language skills, broaden your professional and academic options, and establish a worldwide network of friends.

While on exchange, tuition fees at the host university are waived and you continue to be enrolled at and pay fees to UQ. You can even apply for student exchange scholarships or an OSH-HELP loan to assist with airfares, accommodation, health insurance and living costs.

Learn a language

If your program does not allow you to enrol in languages as an elective, there are other options. The Institute of Modern Languages (IML), located within the University, offers courses in more than 30 languages, from Arabic to Vietnamese, at beginner to advanced levels.

IML language courses cover all four communication skill areas – listening, speaking, reading and writing – in small, friendly classes. You do not need any formal entry requirements for IML courses and they will not be counted towards your degree.

Or you can enrol in a concurrent Diploma in Languages through the Faculty of Humanities and Social Sciences. The Brisbane Universities Language Alliance (BULA) is another avenue for studying languages not available at UQ, so that you can cross-enrol at Griffith University or Queensland University of Technology.

Become a leader in your student community

If you have a passion for supporting other students and making a difference, why not become a student leader? Being the “new kid on the block” can be a daunting experience, which is why UQ has designed a number of programs to create a vibrant campus atmosphere that reaches out to all new students. Whether it be conducting welcome sessions, peer editing, passing on “life skills”, or simply being sociable, student leaders – who come from a variety of backgrounds, study areas and levels of study – are key to making these programs successful.

Receive recognition for your work, enhance your CV and contribute to the UQ Advantage Award. Become the leader we know you can be!
UQ ADVANTAGE AWARD

Be the best “you” possible

The UQ Advantage Award is a program for undergraduate students that combines participating in a range of co-curricular activities with access to a unique symposium series. And it’s free!

By registering for the award, you will enjoy experiences that will help you realize your aspirations, become a leader in your chosen field, make a positive impact on society, and enhance your employability. When you complete all program requirements, you will receive a formal certificate upon graduation that attests to your enhanced student experience and skill set.

UQ Advantage Award

CONSIDER FURTHER STUDY

Once you complete your undergraduate degree, you may decide to keep going:
UQ has many postgraduate study options to choose from.

Undergraduate diploma
Explore a particular area of interest, fulfill pre-requisites for other programs, or upgrade your qualifications with a Diploma in Arts or Science.

Study at your own pace and choose undergraduate courses to suit your personal career goals.

Courses and Programs
www.uq.edu.au/study

Postgraduate study
UQ offers both coursework programs and research higher degrees (RHD) at postgraduate level. Both will give you specialised knowledge, provide a significant advantage in the employment market, upgrade your qualifications, enhance your promotion potential, or pave the way for a career in academia.

Graduate School
www.uq.edu.au/grad-school

Financial assistance
Apply for a UQ Advantage Grant worth up to $1000 to help realise your dreams:

- use towards professional development and co-curricular activities such as internships, volunteering and conference participation
- apply for Summer or Winter Research scholarships
- see www.uq.edu.au/uqadvantage/advantage-grant

To be awarded these degrees you must produce either a 40,000- or 80,000-word thesis of original research. See page 52 for more information.

Considering professional development

Once you begin your career, you may be interested in ongoing tuition to keep up-to-date in your industry.

Some faculties offer work-related courses run intensively over several days or hours, while others are offered on a semester-long basis. Still others are offered online. Check your faculty website for details.

The Institute of Continuing and TESOL Education (ICTE-UQ) also offers a wide range of highly practical technical, academic and vocational programs, corporate training and professional development, educational tours, and professional year programs for industry. You can choose between certificate, diploma, short course or customised programs.

* If you are an International student, studying on a student visa, you may not undertake this program on campus at UQ on a full-time basis; you may only study from your home country and will not be eligible for an Australian student visa.
* Part-time study options only available to domestic students.
* International students complete in 1.5 years.
* This program is not available to international students.
POSTGRADUATE RESEARCH HIGHER DEGREES

Change lives and push the frontiers of health and medical science. Start your research career today by visiting www.health.uq.edu.au/PhD

Want to make an impact?
The research higher degree (RHD) programs available at UQ are the Master of Philosophy (MPhil) and Doctor of Philosophy (PhD). As an RHD candidate at UQ, you will join a culture of research excellence where you will benefit from access to first-class facilities, an extensive network of support and advisors who provide exceptional mentorship and supervision.

Undertake a RHD at UQ and you will join one of Australia’s top three research universities. In the 2014 Academic Rankings of World Universities, UQ was ranked in the top 85 universities in the world, and the third highest Australian institution.

Be part of the best
UQ’s reputation for excellence and innovation is reflected in every facet of Australian health, medical, behavioural and biomedical sciences research. UQ conceived Australia’s first blockbuster vaccine Gardasil®. The internationally acclaimed Triple P Positive Parenting Program emerged from our School of Psychology. UQ’s pain therapeutics start-up OphxPharma Ltd made Australian Stock Exchange history as the largest biotech IPO and UQ’s superconductor technology is now used in two-thirds of the world’s MRI machines.

And our research successes don’t end here. Confidence in our ability to deliver outcomes and a solid return on research investment is high in Australia and internationally.

That’s why we’ve received unprecedented public funding through the Australian Research Council and the National Health and Medical Research Council, as well as other State and Federal government sources and international entities such as the Bill and Melinda Gates Foundation. And we are able to leverage this confidence and our enviable track record to attract support from community organisations and private ventures which share our goals for better health through research.

Learn from the best
It’s no wonder 4,000 academics and nearly 9,000 students choose to launch and build their health and medical careers at UQ. Our research covers a broad range of disciplines in health, medicine, behavioural and biomedical sciences, as well as nine stand-alone research centres and institutes focused on finding solutions to major health problems including:

- Understanding the molecular and cellular basis of diseases such as cancer and autoimmune disease
- Understanding, treating and preventing disease, and the health of mothers and babies
- Our researchers work across all major fields of health and have a reputation for research that translates from “bench to bedside”. Many are internationally recognised leaders in their fields and work with talented young research teams generating lifesaving new discoveries and treatments that impact globally.

Innovation and excellence
Three million dollars is being invested in leading-edge projects to support UQ researchers in their quest to provide improved health outcomes, health education and nurture future generations of health professionals. Those projects include the Pharmacy Australia Centre of Excellence and the UQ Oral Health Centre, Australia’s largest tertiary oral health facility.

Recent successes
Our research is making a difference to healthcare around the world, with award-winning life scientists and clinicians collaborating with teams in Australia and overseas to find new chronic disease prevention and treatment models.

- In 2013 the NHMRC awarded UQ $51 million to pursue discoveries relating to cystic fibrosis, respiratory illness in indigenous children and chronic kidney disease
- With $11 million from the Queensland Government and the estate of Clem Jones, former Lord Mayor of Brisbane, we’re learning more about dementia and Alzheimer’s disease
- We’re hosting the Queensland node of Therapeutic Innovation Australia (TIA) with $6.9 million from the Australian Government and $2 million from the Queensland Government to accelerate the translation of Australian research discoveries into commercial therapeutic products
- The Australian Cancer Research Foundation is helping us target cancer detection and treatment programs with $4 million in support, while $3 million from the TBI Sailors’, Soldiers’ and Airmen’s Association of Queensland (TBI Association) is boosting tuberculosis research

Our scientists are studying the genes associated with debilitating arthritis diseases like ankylosing spondylitis, thanks to US$4 million from the American National Institute of Arthritis and Musculoskeletal and Skin Diseases. At the same time, UQ Diamantina Institute researchers are working on a cure for rheumatoid arthritis, helped by a $1.25 million Premiers’ Science Fellowship.

Your research career starts here
Find out how you can apply and work with leading edge researchers and state-of-the-art research facilities at www.uq.edu.au/grad-school/how-to-apply. Our online process will guide you through the steps:

1. THINK ABOUT POSSIBLE RESEARCH PROJECTS/SUPERVISORS
   To assist with finding a suitable supervisor, investigate possible research topics.

2. LOOK AT AVAILABLE SCHOLARSHIPS
   If you don’t have a scholarship, search our available scholarships at http://scholarships.uq.edu.au

3. REGISTER YOUR INTEREST
   Let us know you’re interested and your preferred School/Centre will provide information and assistance in taking the next steps.

4. COMPLETE A FULL APPLICATION
   Qualified applicants will be invited to complete a full application.
Being aware of the financial aspects of university will help you be better prepared for your new life.

Fees and costs
Course fees and student contributions
When you study at University, at the start of each semester or teaching period (study period) you are charged a fee for each course in which you enrol.

Most undergraduate places at UQ are Commonwealth supported, i.e. funded partly by the Australian Government (Commonwealth support) and partly by you (student contribution).

You qualify for Commonwealth support if you are an Australian or New Zealand citizen, or an Australian permanent resident and have a Commonwealth supported place (CSP). (International students pay full tuition fees.)

If you have a CSP, the amount you pay for a course (your student contribution amount) depends on the fee band level of the course (see table below).

As fees are charged according to the courses you undertake, not the program in which you are enrolled, it is not possible to publish a fixed fee for a program. “Indicative” annual fees (based on average first-year enrolment patterns) are listed on our Courses and Programs website to help you plan your budget.

Courses and Programs website www.uq.edu.au/study

Fees calculator
To help you estimate your course fees for a study period, UQ has an online Fees Calculator. If you add the study period totals together you can then estimate your total enrolment costs.

Before you enrol, faculty Academic Advisors can help you develop a study plan.

Fees calculator

Student Services and Amenities Fee (SSAF)
In 2011 the Australian Parliament passed legislation allowing universities to charge a fee for non-academic services such as sporting and recreation activities, employment and career advice, child care, financial advice, and food services. UQ levies the SSAF – which is capped at a maximum of $2,996 for 2015 – according to whether you are an internal or external student, full-time or part-time. The fee is indexed annually.

SSAF

TOP TIP
Going to university can mean more costs, like accommodation, books and study materials, transport and parking. However:

• Australian Government provides financial support and fee repayment options
• UQ runs a secondhand bookshop and low-cost entertainment activities
• UQ’s Student Services can help with finding accommodation.

Other government assistance
HECS-HELP
If you are a domestic student (see page 46) in a Commonwealth supported place, you may be eligible to receive HECS-HELP.

HECS-HELP is an Australian Government loan scheme that allows you to defer repayment of all or part of the student contribution amount until your income meets a specific threshold. This means you do not have to start repaying your HECS-HELP debt until you earn above a certain income level ($53,345 for the 2014-15 income year). Loan repayments are then taken out of your pay as additional tax. You need to supply your tax file number to apply.

SA-HELP
SA-HELP is a loan scheme that helps you pay for all or part of the SSAF. If you use SA-HELP, the amount will be added to your accumulated HELP debt. You can take out a SA-HELP loan even if you do not wish to take out any other HELP loan. You require a tax file number to obtain SA-HELP.

To obtain HECS-HELP and SA-HELP information
www.studyassist.gov.au

Centrelink Student Services
The Australian Government provides three income-support payments for Australian tertiary students: Youth Allowance, Austudy and ABSTUDY.

You can apply for these payments at any Centrelink Customer Service Centre.

Other schemes include:
• Student start-up loan
• Relocation scholarship
• Interest-free advance loan where part of your student contribution is paid as lump-sum advance
• Parent Education Supplement (PES)
• Low Income Health Care Card
• Parenting Payment
• Child Care Benefit (CCB) or Rebate, or JET Child Care Fee Assistance (if you have children in your care).

Centrelink
www.humanservices.gov.au
Phone 130 130
(1800 132 317 for ABSTUDY only)

Living costs
Proposed higher education reforms
In the May 2014 Budget, the Australian Government proposed changes to funding for higher education. At the time of printing, the proposals have not been passed by the Senate, and UQ – like all Australian universities – does not know the impact of the proposed reforms.

Further information, including a number of “frequently asked questions” about student enrolment scenarios, is available on the Department of Education website.

Explore UQ on your phone, tablet or iPad through one of our many apps. Access exclusive content, videos, image galleries and other interactive features in our publications, find resources to help your studies, or take advantage of our many other exciting programs.

ORGANISATION AND NAVIGATION

UQ Checklist
You’ve received your offer to study at UQ, so what next? Use this checklist to ensure you complete everything you need to do in the right order by the right time – and find out who can help you.

UQ Timetable Planner
Plan your semester timetable with UQ’s official course timetable planner. Add courses to see where conflicts may arise and then easily reschedule. Check your timetable at any time on any device. https://timetableplanner.app.uq.edu.au

UQ Student Guide
Discover information about UQ campuses, services, lifestyle and social opportunities; plus where to live, what costs to expect and what English language requirements you need. Use the interactive program guide to help choose the program you wish to study, follow the step-by-step application process, and watch videos of life at UQ, student achievements and UQ's groundbreaking research.

Contact
UQ’s key alumni and community publication, Contact includes insightful in-depth feature articles, opinion pieces, campus news, book reviews, alumni events and more.

UQnav
This free mobile app contains searchable maps of UQ’s campuses. Enter your destination and UQnav will show you where it’s located – lecture theatres, laboratories, school and faculty offices, coffee shops, entertainment venues and more.

NEWS AND INFORMATION

UQ Open Day
Outlining the full range of information sessions and activities available, this app is perfect to use at each Open Day event to make the most of your day.

UQ Student Advantage
Discover everything UQ has to offer from start to finish. Whether it’s life on and off campus, life as a student and everything in between.

OTHER APPS (THIRD PARTY)

Skype
Free voice and video calls to anyone else on Skype, whether on Android, iPhone, Mac or PC, as well as iMacs to your friends and family, no matter where they are.

OneDrive
OneDrive is the place to store your files so you can access them from virtually any device.

www.uq.edu.au/appcentral
ADMISSION INFORMATION

To study UQ undergraduate programs, you must satisfy prerequisites and have a sufficient entry score (OP/IB/Rank). But there are alternative entry pathways and you can upgrade your score.

**Prerequisites**
Subject prerequisites are the Queensland Year 12 subjects (or interstate/overseas/tertiary/bridging course equivalents) required for individual programs. Some programs have additional prerequisites (e.g., auditions for the Bachelor of Music, and the Undergraduate Medicine and Health Sciences Admission Test (UAMAT) for entry to the Bachelor of Dental Science or Doctor of Medicine (provisional entry for school-leavers)).

**Entry scores**
Entry scores include Overall Positions (OP) and entry ranks. Eligible applicants are selected for admission to a program in order of merit; those with the highest entry score are selected first, and so on until the program quota is filled. The minimum OP or rank required for entry varies from year to year and is determined once applications have been processed and places allocated. While it is difficult to predict exactly what OP or rank will be needed for entry to a program, you can use the previous year's cut-offs as a guide.

**QO-P Guarantee**
If you achieve an OP score in the range of 1-5 (or entry rank equivalent) and have completed required prerequisite subjects, you are guaranteed a place in the majority of QO-P undergraduate programs, regardless of the published program cut-offs.

**English language requirements**
If you are not from an English-speaking background, you will need to provide evidence of English proficiency. You can do this by passing Queensland Year 12 English (or interstate/international equivalent), or by other means detailed in the Entry Options booklet available at www.uq.edu.au/study/docs/domestic/entry-options.pdf or www.uq.edu.au/international/language-requirements. Standard English language proficiency requirements are IELTS 6.5 overall with at least 6.0 in each sub-band (see table below), although some programs require higher levels; see individual program entry requirements.

**Special entry programs**
If you are of Australian Aboriginal and/or Torres Strait Islander descent, or have experienced financial hardship or other difficult circumstances that have negatively impacted your studies, you may be eligible for special entry to UQ. Contact UQ Admissions for more information.

**UO’s Bonus Rank Scheme**
UO’s Bonus Rank Scheme gives current Year 12 high school students extra points towards their entry score for completing certain approved subjects or courses. Contact UQAdmissions for more information.

**Programs for high school students**
UO’s Enhanced Studies Program (ESP) lets you complete a university course at one of three UO campuses during the summer, so you may even receive credit for the course you completed if you subsequently go on to study at UQ: see www.uq.edu.au/esp. The Young Scholars Program is another opportunity to discover, learn and engage with UO’s academic community and like-minded students from across Queensland. See www.uq.edu.au/youngscholars. Other opportunities include the Institute of Modern Languages (IML) summer intensive sessions: see www.imf.uq.edu.au/highschool.html and a range of faculty workshops and seminars: see www.uq.edu.au/schools/activities-for-schools.

**NOTES:** * Test scores are valid for two years from the date of the test to the date of commencing the UQ program.

**HOW TO APPLY**
Apply for UQ undergraduate program admission through the Queensland Tertiary Admissions Centre (QTAC). Check the QTAC Guide or the QTAC website for details on how to apply and what entry requirements you need. Free printed guides are given to all current Queensland Year 12 students and some interstate students. You can also buy a copy from some newsagents or through QTAC.

You may list up to six preferences for programs offered at any participating QTAC institution, but you can only receive one offer, which will be for your highest eligible preference. When applying, make sure you place programs in order of personal preference, putting the one you must want to study first, and the one you least desire last. See the QTAC website for the 2015 application deadlines.

**QTAC**
www.qtas.edu.au
Online enquiry form www.qtas.edu.au/AccountQTACEnquiry.html
Phone 1300 467 952

**UQ Admissions**
www.uq.edu.au/study/admissions
Email admissionsenquiries@uq.edu.au
Phone +61 7 3365 2203

**How to apply to UQ**

1. **SELECT THE PROGRAM YOU WANT TO STUDY**
Search for your program in this guide or on UQ’s Courses and Programs website at www.uq.edu.au/study (please check that you have met all academic and other entry requirements and that you have met any specific program deadlines).

2. **APPLY**
Current Year 12 students: go to Twelve-to-Tertiary (TT) at www.qtas.edu.au Other prospective students: go to Apply-by-Web of www.qtas.edu.au Students from other universities: if you wish to study one or more courses at UQ as credit towards your program, download a Cross-Institutional Enrolment form at www.uq.edu.au/academic/forms-online (but first check that your home institution will give you credit).

3. **ACCEPT OFFER**
1. Log in to www.qtas.edu.au/OnlineServices/OnlineServices.html
2. Select Current applicant: Login
3. Select the Accept offer option
4. Accept your offer
5. Go to www.uq.edu.au/startingatUq/ and follow instructions

4. **ENROL**
1. Access your first year planner to find out what you must study
2. Choose your courses (see myAdvisor at www.uq.edu.au/myadvisor for help)
3. Enrol online via mySSN-net at www.imf.uq.edu.au
4. Plan your timetable and sign on to classes
5. Pay fees

5. **ATTEND ORIENTATION AND BEGIN YOUR UQ STUDY EXPERIENCE**
Held in the week before semesters 1 and 2. Orientation is an important step in starting university: get your student ID card, attend compulsory Faculty or School information and welcome sessions, and get your questions answered in time for when you start formal classes the following week.
More than 11,500 international students from 142 countries currently call UQ home.

You are an International student if you are a:
• temporary resident (visa status) of Australia
• permanent resident (visa status) of New Zealand, or
• resident or citizen of any other country.

Eligibility for UQ study
For admission into undergraduate programs at UQ, you must have:
• completed recognized upper secondary or equivalent Year 12 studies to the required standard
• satisfied individual program requirements (e.g. specific subject prerequisites, auditions or interviews)
• satisfied English language requirements.
• if you do not meet these criteria, you might consider taking the Foundation Year bridging course offered by the Institute of Continuing and TESOL Education Services (IES). The Foundation Year program is accepted by all UQ undergraduate programs.

Study Abroad and incoming exchange
If you are an international student currently enrolled at an accredited overseas university, you may be eligible to study at UQ for one or two semesters under the Study Abroad or Incoming Exchange program. Credit gained at UQ is usually transferred towards your degree at your home university, where you will continue to pay your tuition fees.

More information
www.uq.edu.au/study/abroad

Fees, charges and expenses
All international students applying to study in Australia must have a student visa and study full-time, on-campus.
• Please consider expenses such as visa and medical (pre-departure) fees, tuition fees, general living expenses, return airfares, and Overseas Student Health Cover (OSHC) when you plan your budget.
• UQ has program-based fees for coursework award programs, meaning that all courses within a program are charged at the same tuition fee rate per unit for a given academic year.

Department of Immigration and Border Protection (DIBP)
www.immi.gov.au

Services for international students
Upon your arrival, UQ representatives will meet you at the airport and then help you organise orientation and academic preparation sessions.

International Student Advisors can help you quickly settle into life as a UQ student and can also answer your questions about health services, family matters, schooling or childcare, social events, and cultural or religious organisations.

More information
www.uq.edu.au/student-services/new2uq/

PHARMACY AUSTRALIA CENTRE OF EXCELLENCE
Within walking distance to the St Lucia campus, PACE is an ultramodern, purpose-built facility which is home to UQ’s School of Pharmacy. Well equipped with contemporary teaching and research laboratories, mock pharmacy counselling rooms, innovative teaching dispensaries and many student interaction spaces, it is the hub for all things pharmaceutical at UQ.

HERSTON
Located only two kilometres from Brisbane’s centre, Herston is UQ’s core campus for clinical health teaching and research. Located alongside the Royal Brisbane and Women’s Hospital it adds great benefit to our students and staff by being in the heart of a fast-paced clinical academic environment.

ORAL HEALTH CENTRE
The UQ Oral Health Centre is the largest and most advanced tertiary oral health facility within Australia and is based at the Herston campus. It brings together renowned academics, researchers, leading practitioners and top-tier students who are united by their passion to improve the lives of everyday Australians through improved dental care.
**Not all applicants on OP 1 (or equivalent) gained entry, UMAT scores were used as a secondary differentiator and the lowest UMAT Scaled Score aggregate offered was 174.53 (Jan offer round)**

**Not all applicants on this OP (or equivalent) gained entry**
